

Taliawebs-website

Home page

Welcome to Massimo Talia's personal website. This website was born in order to introduce and advertise Massimo Talia's professional profile. A Motivated and enthusiastic electronics engineer, he spent some years working as software engineer, IT analyst in the Italian industrial field and in IT consultancy private firms. In this years he could improve his skills in the field of information technology and real time systems for safety critical applications. As creative thinker, he was always interested in the conception of new solutions, researching new potential products in the field of information systems and system engineering, combining them in one product. He loves sport, travelling and keeping in touch with new friends. If you'd like to know more about him, visit the other website pages. Below you can see his personal spot.
